

Highams Interim Practice

Highams Interim Practice specialises in the provision of highly experienced interim managers to the Insurance Sector.

In today's business world, change is unavoidable. At Highams our Interim Management team will help you to manage change by providing highly experienced and very talented interim managers when you need them most.

We have a team of highly experienced consultants with specialist experience within the Insurance sector. This experience helps us to develop strong partnerships with all our clients and candidates. Highams Interim Practice provides intelligent, pioneering and highly effective solutions across all business areas including change management, transition management, programme management, strategic development and extra management bandwidth.

Highams Interim Practice will give clients immediate access to our "talent bank" of interim managers. Ranging from board level to senior management all our interim managers are subjected to rigorous assessment which enables Highams to provide delivery focused, apolitical and culturally attuned candidates. Daily fee rates range between £650 - £2,000 per day.

The Highams Interim Practice offers a level of quality and professionalism that truly sets us apart. By managing every assignment and every interim manager Highams can provide a cost efficient and more effective alternative to executive resourcing.

We are proud members of the Institute of Interim Managers (IIM).

Because Talent Matters
