

Wealth & Funds Management

Highams Group has been a specialist within the Financial Services Sector for over 20 years. This focused approach has been made possible through our experienced team of niche IT and Financial Services experts and has rewarded us with a superb client base.

One of the key benefits that our clients rely upon is our extensive knowledge of business and IT trends within the Financial Services sector. This ensures that we are always able to support them with the right resources no matter which system our clients choose. One such area which Highams specialise in is Wealth Management.

There are a number of different Wealth Management software packages available on the market, for which Highams can provide experienced staff in a variety of roles:
